# ShowerPowerBooster Registered Installer Notes & Conditions

By completing this form you are giving us permission to display the following information. Please contact us if you **do not** require us to display any of the information

We will link back to your web site, please link back to <https://showerpowerbooster.co.uk/>

We will register you as a plumber in good faith but we will contact you within one month of registration to discuss with you your registration. We reserve the right to remove your registration.

The ShowerPowerBooster is so very simple to install that fitting one is possible by an installer with basic plumbing skills but it is important that the installation requirements within the Technical Specification are followed:

<https://showerpowerbooster.co.uk/wp-content/uploads/2019/07/SPB-Information-Manual.pdf>

We are happy to discuss specific jobs and advise you on options and easier ways to do what you want to do before purchase of the pumps. If your customer has already purchased the pumps (and most purchase the pumps themselves), we are happy to discuss your plans. If you do run in to difficulties, we are happy to advise you.

Thank you for filling out the form, please either email or post us the information:
